

A. Vypočítej.

$$10 + 7 + 33 = \square$$

$$13 - 11 + 23 = \square$$

$$9 + 20 + 10 - 3 = \square$$

$$21 + 9 - 5 = \square$$

$$30 - 11 + 4 = \square$$

$$7 - 2 + 17 + 23 = \square$$

$$27 - 14 - 13 = \square$$

B. Doplň výpočet.

$$6 + \square + 12 = 22$$

$$33 + 2 - \square = 16$$

$$\square + 2 + 22 = 39$$

$$41 + 7 - 5 - \square = 20$$

$$\square + 1 + 9 = 49$$

$$20 - 12 + \square + 1 = 13$$

$$50 - 10 - \square = 33$$
